PREFACE

THESE PROFILES CONSIST OF COLLECTIONS OF DATA ABOUT EACH OF THE 56 MONTANA COUNTIES, PRESENTED IN COMPUTER-GENERATED TABLES. STATISTICAL FACTS, SELECTED FROM GOVERNMENTAL PUBLICATIONS AND COMPUTER TAPES, ARE PRESENTED IN TABULAR FORM TO SERVE AS A CONVENIENT REFERENCE ON SOCIAL AND ECONOMIC FACTS ABOUT EACH COUNTY. EXAMPLES OF BOTH COMPUTED AND DERIVED FIGURES IN THE TABLES PROVIDE A STARTING POINT FOR ANALYSIS.

IN THIS FOURTH EDITION, AN EFFORT IS MADE TO CONDENSE OR ELIMINATE THE LESS TIMELY DATA, TO ADD NEW TABLES OF CURRENT INTEREST, AND TO BRING UP TO DATE THE CONTINUING HISTORICAL SERIES. THE PLACEMENT OF COMPARATIVE STATE DATA ADJACENT TO COUNTY DATA IS AN ADDED FEATURE OF THIS EDITION.

MONTANA COUNTY PROFILES ARE ALSO AVAILABLE ON COMPUTER OUTPUT MICROFICHE.

APPENDIX B

The following notes and definitions are limited to a few concepts related to the presentation of statistical data in the profile tables. Data users can find much additional information in the source documents listed at the bottom of each page of the profiles.

Agriculture Statistics: In Section 9, census data totals for 1978 at the state level are not directly comparable with totals for 1974, as they include data for farm operations represented on the mail list plus estimates from the direct enumeration sample for farms not represented on the mail list. County level data are generally comparable.

County Geography: Anaconda-Deer Lodge County and Butte-Silver Bow County except Walkerville are areas where census county division boundaries were changed and comparable 1970 data may not be available.

The portion of Yellowstone National Park in Montana is not included in any county and therefore is shown for census purposes as a county equivalent. However, in the 1980 census an incorrect tabulation placed 209 persons and 108 housing units in Yellowstone National Park instead of Park County. Since tabulations of detailed characteristics of these persons and households will not be corrected, a separate profile "Yellowstone National Park" is provided to help data users analyze Park County data.

Establishment: For census purposes an establishment is a single physical location where business is conducted or where services or industrial operations are performed. See also "Industry classifications".

Housing Unit: For census purposes a housing unit is a house, apartment, mobile home or trailer, group of rooms, or a single room occupied as a separate living quarter or, if vacant, intended for occupancy as a separate living quarter. "Separate living quarters" are those in which the occupants live and eat separately from any other persons in the building and which have direct access from the outside of the building or through a common hall. Housing unit inventory includes recreational vehicles, boats, caves, tents, railroad cars, etc. only if they are occupied as someone's usual place of residence. Vacant mobile homes are included provided they are intended for occupancy on the site where they stand.

Income (Imputed): The term as used in Table 9.7 represents the value of home consumption, gross rental value of farm dwellings, and receipts from non production farm-related sources and from custom work.

Index Numbers: An index number measures difference or change, relating one quantity of a specified kind to another quantity of the same kind, usually over periods of time. One kind of price index, the "Implicit Price Deflator for Personal Consumption Expenditures (PCE)", is used in Tables 6.5, 6.6, 10.2, and 10.5 with the assumption that price changes between the base year, 1972, and other years were the same in Montana as in the nation as a whole.

Industry Classifications: The Standard Industrial Classification (SIC) System classifies establishments by primary type of activity which is determined by their principal product of group of products produced or distributed, or by services rendered. See Tables 5.4, 5.8, 6.4, 10.2, 10.5, 10.6. Classifications are based on the 1972 edition of the Standard Industrial Classification Manual and its 1977 supplement. The SIC System facilitates the collection, tabulation, presentation, and analysis of data relating to business, industrial, and other types of establishments. It also promotes uniformity and comparability in the presentation of statistical data collected by various government agencies, trade associations, and private research organizations.

Labor Force: Persons 16 years old and over, employed or unemployed, constitute the civilian labor force. The civilian labor force and members of the Armed Forces constitute the labor force. "Not in labor force" refers to persons 16 years old and over consisting mainly of students, housewives, retired workers, seasonal workers in an "off" season who are not looking for work, inmates of institutions, disabled persons, and persons doing only incidental unpaid family work (fewer than 15 hours a week). Also included are the "discouraged workers" who do not have a job and have given up actively looking for work.

Mean/Median/Per Capita Averages: An arithmetic mean is the sum of the values of all items divided by the number of items. Sometimes called the simple average, the mean is used most frequently although it is not always the most meaningful descriptor. Because a mean is affected by very large or very small numbers, a median value may be more useful when considering small sets of numerical data.

Median is the value that divides the distribution (lowest to highest or vice versa) into two equal parts, one half the items falling below this value and one half exceeding this value. If there is an even number of items, the median is the average of the two middle items.

Per Capita is an average computed for every person in a specified population; the total value of an item divided by the number of persons in the specified population.

Net Migration: Estimates of net migration, or the difference between net change and natural increase, were derived using births and deaths in 1970 through 1979. See Tables 1.5, 2.4, and 2.7.

Poverty: Reference is to a set of money income cutoffs or "poverty threshold" against which income of families and specified persons is compared. The income cutoffs vary by family size, number of children, and age of the family householder or unrelated individual. Poverty thresholds are computed annually on a national basis only. No attempt has been made to adjust these thresholds for regional, state, or other local variations in the cost of living.

Residence: In the censuses each person was counted as an inhabitant of his usual place of residence, generally meaning the place where he lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile. Members of the Armed Forces living on military installations were counted as residents of the area in which the installation is located; college students as residents of the area in which they were living while attending college; inmates of an institution as residents of the area where the institution was located.

Sample Data: Data based on a sample (e.g., the long-form census questionnaire) are weighted or inflated to produce estimates of what a complete count would have found. The amount of chance error present between an inflated sample figure and a corresponding complete count is relatively small for large areas or large populations. However, for areas with small populations, sample data should be used with caution.

Social Security: For program definitions and history of the provisions of the Social Security Act, see the Social Security Bulletin, Annual Statistical Supplement, Social Security Administration, U.S. Department of Health and Human Services.

Urban/Rural Population: "Urban" and "Rural" are type-of-area concepts. Urban population comprises all persons living in urbanized areas (UA's) and in places of 2,500 or more inhabitants outside UA's. Rural population consists of everyone else. Within small counties, measurements of urban and rural populations over time may be significantly affected by the increase or decrease of a place's population across the 2,500 population threshold.
